**DILUTION CONTROL**

**DILUTION CONTROL** is very important in correct chemical usage. Ensuring your operators are well trained in this aspect reduces excess dosing and aids in cost control, safety and cleaning efficiency.

1. **Basic DILUTION CHART** - simple chart showing the ratios of chemical to water for a typical range of dilution rates.
2. **Standard task DILUTION CHART** - bespoke chart listing the exact dilutions required for your given task / chemical combination.
3. **User specified dose chart** - same as the standard task dilution chart but you are able to specify your dosing method/size. E.g. you can specify a 38ml pelican pump and the system automatically calculates number of ‘shots’ required for each of your task/chemical combinations.

All of these charts are available as high resolution A4 PDF files.

**Example Site**

- **GEN1**
  - Housekeeping - hard surface cleaning (damp wiping)
  - Selguard
  - 1:38

- **GEN2**
  - Flooring - damp mopping (general)
  - Selgleem Lemon
  - 1:10

- **KIT1**
  - Catering - dish washing (manual / hand)
  - Seldet
  - 1:30

- **KIT2**
  - Catering - hard surface cleaning (damp wiping)
  - Amphotol
  - 1:25

- **KIT5**
  - Catering - hard surface cleaning (spray and wipe)
  - Kitchen Cleaner
  - 1:8

- **WASH1**
  - Washroom - toilet and urinal cleaning
  - Act Original
  - 1:50
